

Providing software solutions to the sugar industry for more than 30 years

Weighbridge Transaction System

The new release of the weighbridge transaction system (WayTrans) is now fully web based, and incorporates all the flexibility and features of the previous release. It has been designed to record transactions that pass over a weighbridge. These loads may be bulk, liquid or packaged. A cash sales module is available for the sale of packaged products. This application provides an extensive range of documentation that may be required for all stages of the process from order to delivery, for despatch and purchasing, to receipt for supply.

Features:

Despatching Operations

Order Entry

Load validation on vehicle receipt

Packing floor load scheduling

Authorise load release

Provides full despatch documentation on departure from weighbridge

Email pick-up schedule to carriers

Full support for pallet control

Export documentation produced

Receivals Operations

Manifest for incoming products when orders placed

Order matching at weighbridge

Full documentation produced on receipt

Product analysis for quality evaluation

Cash Sales Module

Point of sale for various products Supports quotas for clients Produces despatch documentation and invoicing

Tare Weigh & Load Validation

On arrival at the weighbridge, the driver quotes his order number, which is validated before proceeding. The vehicle is tare weighed and a Load Authorisation docket is produced.

Amend/Acknowledge Load Details

Before each load is released, the packing floor personnel checks the loading details, amends where required and authorises the load for shipment.

Bulk Transaction

the empty vehicle when it departs.

Gross Weigh Procedure

For the receivals transactions, two operations

take place. The first weighbridge procedure is

the gross weighing of the loaded vehicle when

it arrives and the second is the tare weighing of

When the vehicle arrives, the driver provides

the delivery details of the load. This information may have already been entered using a Load Identification Utility, which provides a set of

supplier details for an order. If this number is

quoted, all of the delivery details will be

W/B Operation

Packing Floor Load Load Schedule

A dynamic display provides a list of vehicles expected for the next 48 hours. It is ordered by the ETA time and provides a single line summary for each order. When a vehicle has arrived at the W/B, registration details, tare weight and order number are displayed.

Weighbridge Departure

Check load is completed, gross weigh is taken.

Despatch documentation is completed, including:

- Despatch Docket
- Certificate of
 Conformation
- Load Audit Check.

Tare Weigh Procedure

Once the vehicle has been unloaded and arrives back at the weighbridge it can be tare weighed. A unique transaction number is generated for each receivals transaction. This reference number is useful for future enquiries.

Cash Sales Module

Mirrabooka

THE SUGAR REFINERY

Products other than bulk can be handled by this package. These usually include items that are pre-packaged such as bags, or drums etc.
