## Road Delivery Mimic

This mimic has been produced specifically for factories using road transport.

It provides a complete overview of the delivery cycle, from the remote field entry of the consignment details and each phase as it progresses through the factory processing stage.

The screenshot displays the following data tables:

## Features

- Web-based mimic, runs in any modern web browser
- Truck and bin identified by RFID
- AWCS (Automatic Weighing and Control Station) records weight details
- Diagnostic warning message

The mimic can be run in two modes. *Operator Mode* is available to users with the appropriate permissions and allows amendments to be made. *Monitor Mode* is available to anyone, and restricts the user to passively viewing the mimic. It runs in any modern web browser, convenient for a wide range of personnel.

# Field Details

The Field section lists all of the bins that have been consigned from the field using telemetry.
